# ETL Pipeline & Data Quality Summary

Data Quality & ETL Summary:

- Extracted dataset from Kaggle (Cars Datasets 2025).

- Handled missing values and unicode encoding errors in Python.

- Cleaned prices by removing '$', ',', and ranges (e.g., '12000-15000' -> 12000).

- Loaded data into a Star Schema (fact_cars, dim_car, dim_company).
